VOLUME 29

1954

THE SCIENCE PRESS

LANCASTER, PENNSYLVANIA

TABLE OF CONTENTS

Number 1. January

The metabolism of nitrogenous compounds by sunflower crown gall tissue cultures. F. S. Eberts, R. H. Burris and A. J. Riker 1– 10

Auxin inactivation and its relation to leaf drop caused by the fungus *Omphalia flavida* ..... Luis Sequeira and Taylor A. Steeves 11– 16

Direct chemical proof of ethylene production by detached leaves. Harlan K. Pratt 16– 18

Metabolism of sucrose and related oligosaccharides by spores of the fungus *Myrothecium verrucaria* ..... G. R. Mandels 18– 26

Peanut and oil palm foliar diagnosis interrelations of N, P, K, Ca, Mg. P. Prevot and M. Ollagnier 26– 34

The respiration of the pea plant. Oxidation of hexose phosphate and pentose phosphate by cell-free extracts of pea leaves ..... Martin Gibbs 34– 39

Effects of shade and partial defoliation on carbohydrate levels and the growth, fruiting and fiber properties of cotton plants. Frank M. Eaton and David R. Ergle 39– 49

Respiration of maize grain ..... Hassan Ragai and W. E. Loomis 49– 55

Studies in plant metabolism. III. Absorption, translocation and metabolism of radioactive 2,4-D in corn and wheat plants. S. C. Fang and Joseph S. Butts 56– 60

Inhibition of growth of *Chlorella pyrenoidosa* by beta-emitting radioisotopes. J. W. Porter and H. J. Knauss 60– 63

Effect of 2,4-dichlorophenoxyacetic acid on photosynthesis and respiration. R. T. Wedding, L. C. Erickson and B. L. Brannaman 64– 69

Organic acid metabolism and ion absorption in roots. Louis Jacobson and Lawrence Ordin 70– 75

Zinc content of bean plants in relation to deficiency symptoms and yield. F. G. Viets, Jr., L. C. Boawn and C. L. Crawford 76– 79

The influence of cobalt and sugars upon the elongation of etiolated pea stem segments ..... Carlos O. Miller 79– 82

Applicability of Poiseuille's Law to exudation of oleoresin from wounds on slash pine ..... C. S. Schopmeyer, François Mergen and Thomas C. Evans 82– 87

The effects of three levels of magnesium on the nutrient element composition of two inbred lines of corn and on their susceptibility to *Helminthosporium maydis* ..... George A. Taylor 87– 91

Auxin relationships of the rice coleoptile ..... Noboru Yamada 92– 96

An improved infiltration series for studying stomatal openings as illustrated with coffee ..... Paulo de T. Alvim and John R. Havis 97– 98

Studies on the nitrogenous nutrition of rice ..... E. Malavolta 98– 99

The inhibiting effect of root tips on the elongation of excised Pisum epicotyls cultured in vitro ..... Robert T. Howell 100–102

Leaf and air temperatures under freezing conditions ..... R. H. Shaw 102–104

Some observations on the reduction of 2,3,5-triphenyltetrazolium chloride in plant tissue as influenced by mineral nutrition ..... John C. Brown 104–107

The extraction and colorimetric estimation of indole-3-acetic acid and its esters in developing corn kernels. O. N. Hinsvark, Wm. H. Houff, S. H. Wittwer and H. M. Sell 107–108

News and notes 109–111

Preparation of manuscripts 111–112

Number 2. March

The estimation of dehydrogenases in plant tissue. Carl A. Price and Kenneth V. Thimann 113–124

Seed vitality and other cotton characters as affected by the age of seed.
BASIL G. CHRISTIDIS 124–131

Vitamin content of turnip-green plants in relation to growth.
RUTH REDER and GEORGE V. ODELL 131–135

The effect of temperature on the conversion of protochlorophyll to chlorophyll a in etiolated barley leaves ..... JAMES H. C. SMITH and ALLEN BENITEZ 135–143

The development of chlorophyll and oxygen-evolving power in etiolated barley leaves when illuminated ..... JAMES H. C. SMITH 143–148

Measurement of algal growth under controlled steady-state conditions.
J. NEAL PHILLIPS, JR. and JACK MYERS 148–152

Growth rate of Chlorella in flashing light.
J. NEAL PHILLIPS, JR. and JACK MYERS 152–161

Recording oxidation-reduction potentials in plant preparations.
JOHN D. SPIKES, RUFUS LUMRY, JOHN S. RIESKE and RUDOLPH J. MARCUS 161–164

Studies on the photosynthetic reaction. II. Sodium formate and urea feeding experiments with *Nostoc muscorum*.
RUFUS K. ALLISON, HOWARD E. SKIPPER, MARY R. REID, WILLIAM A. SHORT and GERTRUDE L. HOGAN 164–168

Fruit respiration and ethylene production.
JACOB B. BIALE, ROY E. YOUNG and ALICE J. OLMSTEAD 168–174

The effect of x-rays on uptake and loss of ions by potato tuber tissue.
N. HIGINBOTHAM and E. S. MIKA 174–177

The effect of light on the oxygen metabolism of the photosynthetic bacterium, *Rhodospirillum rubrum* ..... J. A. JOHNSTON and A. H. BROWN 177–182

Fluctuations in sensitivity of the Avena test due to air pollutants.
HEBREBT M. HULL, F. W. WENT and NOBORU YAMADA 182–187

A light activated accumulation of niacin in tomato leaf disks.
FREDERICK L. CRANE 188–190

B vitamins in starchy and sugary maize endosperms ..... HOWARD J. TEAS 190–194

Thicker aleurone inadequate explanation for higher niacin in sugary maize.
FREDERICK D. RICHEY and RAY F. DAWSON 194–196

A device for continuous aeration and nutrient renewal of entire plants under sterile conditions ..... H. E. BREWER 196–199

Fixation of N_2^{15} by excised nodules ..... WAYNE E. MAGEE and R. H. BURRIS 199–200

A simple demonstration of some properties of capillaries ..... JOHN P. DECKER 201

An energy dependent incorporation of amino acids into the protein of plant mitochondria ..... GEORGE C. WEBSTER 202–203

NUMBER 3. MAY

The growth and inorganic nutrition of *Scenedesmus obliquus* in mass culture.
ROBERT W. KRAUSS and WILLIAM H. THOMAS 205–214

Some effects of deuterium oxide on the quinone Hill reaction of *Chlorella pyrenoidosa* Chick ..... LEONARD HORWITZ 215–219

The interrelation between CO_2 metabolism and photoperiodism in Kalanchoë.
F. G. GREGORY, IRWIN SPEAR and K. V. THIMANN 220–229

The absorption of inorganic ions by *Chlorella pyrenoidosa*.
H. J. KNAUSS and J. W. PORTER 229–234

The influence of hydrogen ion concentration on cation absorption by barley roots.
HUSSEIN FAWZY, ROY OVERSTREET and LOUIS JACOBSON 234–237

On the biosynthesis of carotenoids.
C. O. CHICHESTER, PATRICIA S. WONG and G. MACKINNEY 238–241

Causes of injury to flooded tobacco plants.
PAUL J. KRAMER and WILLIAM T. JACKSON 241–245

Subcooling and ice nucleation in lemons ..... JOHN W. LUCAS 245–251

The relative sensitivity of Xanthium leaves of different ages to photoperiodic induction ..... ABDUL-KARIM KHUDAIRI and KARL C. HAMNER 251–257

Carbohydrate metabolism and oxalic acid synthesis by *Botrytis cinerea*.
ARTHUR C. GENTILE 257–261

Nature and distribution of glycolic acid oxidase in plants.
CLIFFORD R. NOLL, JR. and R. H. BURRIS 261–265

The oxidation of reduced diphosphopyridine nucleotide by an ascorbate system from cucumber ..... HARRY BEEVERS 265–269

The proteins of green leaves. VI. Centrifugal fractionation of tobacco leaf homogenates and some properties of isolated chloroplasts.
ANDRÉ T. JAGENDORF and SAM G. WILDMAN 270–279

The role of vitamins and micronutrient elements in the nutrition of the apical meristem of pea roots ..... JOHN G. TORREY 279–287

Isolation of carbon-14-labeled sedoheptulose and other products from *Sedum spectabile* ..... N. E. TOLBERT and L. P. ZILL 288–292

The effect of auxin on the flowering behaviour of Wintex barley and Petkus rye.
G. HUSSEY and F. G. GREGORY 292–296

The electrophoretic behavior of lignin ..... EMMETT BENNETT 297–298

Diphosphopyridine nucleotide–nitrate reductase from soybean nodules.
HAROLD J. EVANS 298–301

Possible interaction between light-dark cycles and endogenous daily rhythms on the growth of tomato plants .... HARRY R. HIGHKIN and JOHN B. HANSON 301–302

Metabolism of 2,4-dichlorophenoxyacetic acid. III. Metabolism and persistence in dormant plant tissue.
ROBERT L. WEINTRAUB, JUSTIN H. REINHART, ROGER A. SCHERFF and LEE C. SCHISLER 303–304

The effect of light intensity on photosynthetic rate in Scotch pine.
JOHN P. DECKER 305–306

Nomenclature of chemical plant regulators. Report by a committee of the American Society of Plant Physiologists ..... VAN OVERBEEK ET AL 307–308

News and notes 308–310

NUMBER 4. JULY

A porphyrin pigment from photosensitive non-chlorophyllous plant tissues.
GLENN W. TODD and A. W. GALSTON 311–318

Position of C^{14} in alcohol and carbon dioxide formed from labeled glucose by corn root tips ..... HARRY BEEVERS and MARTIN GIBBS 318–321

The direct oxidation pathway in plant respiration
HARRY BEEVERS and MARTIN GIBBS 322–324

Investigations into the function of pyridoxin as a growth factor for excised tomato roots ..... WILLIAM G. BOLL 325–331

Studies on the chemistry of the living bark of the black locust in relation to its frost hardiness. VII. A possible direct effect of starch on the susceptibility of plants to freezing injury ..... D. SIMINOVITCH and D. R. BRIGGS 331–337

The availability of magnesium from organic carriers in artificial substrates.
STUART DUNN and SUZANNE S. ROBERTS 337–342

Translocation of radioactive isotopes from various regions of roots of barley seedlings ..... HERMAN H. WIEBE and PAUL J. KRAMER 342–348

Effect of differential nitrogen, potassium, and magnesium supply to young Valencia orange trees in sand culture on mineral composition especially of leaves and fibrous roots ... PAUL F. SMITH, WALTER REUTHER, ALSTON W. SPECHT and GUSTAVE HRNCIAR 349–355

The influence of mineral nutrition on the organic acids of the tomato, *Lycopersicum esculentum* .. APOLINARIO R. CARAÑGAL, JR., E. K. ALBAN, J. E. VARNER and R. C. BURRELL 355–360

Nitrogenous constituents of sap exuded from the sapwood of *Acer saccharum*.
JOHN K. POLLARD, JR. and THOMAS SPROSTON 360–364

Studies in plant metabolism. IV. Comparative effects of 2,4-dichlorophenoxyacetic acid and other plant growth regulators on phosphorus metabolism in bean plants ..... S. C. Fang and Joseph S. Butts 365–368
Promotion by zinc of the formation of cytochromes in *Ustilago sphaerogena*. Phyllis Weisel Grimm and Paul J. Allen 369–377
Auxin physiology in bean leaf stalks ... Kobe Shoji and Fredrick T. Addicott 377–382
Incorporation of radioactive glutamic acid into the proteins of higher plants. George C. Webster 382–385
The effect of temperature on the behavior of malic acid and starch in leaves of *Bryophyllum calycinum* cultured in darkness ... Hubert Bradford Vickery 385–392
Smog injury and rust infection ..... C. E. Yarwood and John T. Middleton 393–395
Precursor relationships in light activated accumulation of niacin in leaf disks from normal, light-starved, and zinc deficient tomato plants. Frederick L. Crane 395–397
Assay of cytochrome oxidase activity of sunflower leaf tissue in relation to pH value and cation concentration of the buffer. Leonard H. Weinstein, W. Rei Robbins and Walter W. Wainio 398–399
The effect of carbon monoxide on respiration in higher plants. George C. Webster 399–400
Nomenclature of chemical plant regulators—A criticism ..... Poul Larsen 400–401
Book review ..... J. A. Schiff 401

Number 5. September

The occurrence of coenzyme A in plants ..... Eli Seifter 403–406
Studies on the chemistry of the living bark of the black locust in relation to its frost hardiness. VIII. Possible enzymatic processes involved in starch-sucrose interconversions .. M. H. Ewart, D. Siminovitch and D. R. Briggs 407–413
The interrelation between CO_2 metabolism and photoperiodism in Kalanchoë. II. Effect of prolonged darkness and high temperatures. Irwin Spear and Kenneth V. Thimann 414–417
Some physiological characteristics of ascospore activation in *Neurospora crassa*. Mary R. Emerson 418–428
Effect of scald on apple skin respiration .. H. W. Siegelman and H. A. Schomer 429–431
A study of chlorophyll in a white mutant strain of *Helianthus annuus*. R. H. Wallace and A. E. Schwarting 431–436
The dark fixation of carbon dioxide as a factor in photoperiodism. Ruble Langston and A. C. Leopold 436–440
Changes in free auxin content during the photoinduction of short-day plants. Anson R. Cooke 440–444
Seasonal and diurnal changes in the water contents and water deficits of Bartlett pear leaves ..... Wm. B. Ackley 445–448
The physical environment of chloroplasts as related to their morphology and activity in vitro ..... John H. McClendon 448–458
The terminal respiratory enzymes in *Neurospora tetrasperma* .. Sze-chuh Cheng 458–467
Effect of light on the formation of a pigment in the tomato fruit cuticle. A. A. Piringer and P. H. Heinze 467–472
Photosynthesis in Chlorella during intermittent illumination of long periodicity. C. P. Whittingham 473–477
Phosphorus nutrition of soybeans ..... Robert W. Howell 477–483
The effect of volatile substances released by soil, humus and composts on the growth of excised roots ..... D. J. Persidsky and S. A. Wilde 484–486
Differences in survival of excised ponderosa pine leaves of various ages. Johnson Parker 486–487
Calcium and magnesium in citrus seeds ..... Arthur Wallace 488
The immediate effect of severing on the photosynthetic rate of Norway spruce branches ..... J. Clark 489–490

The influence of 2,4-dichlorophenoxyacetic acid on the phosphorus metabolism of cranberry bean plants (*Phaseolus vulgaris*).
THEODORE L. REBSTOCK, CHARLES L. HAMNER and HAROLD M. SELL 490–491
Turbidimetric determination of dry weight of algae.
VIOLET M. DILLER and HAROLD J. KERSTEN 492
News and notes 493–494

NUMBER 6. NOVEMBER

Dehydrogenase activity and respiration; a quantitative comparison.
CARL A. PRICE and KENNETH V. THIMANN 495–500
The carbon dioxide content of field air.
H. W. CHAPMAN, L. S. GLEASON and W. E. LOOMIS 500–503
A developmental study of D-glyceric acid dehydrogenase.
HELEN A. STAFFORD and ANNA MAGALDI 504–508
Partial reactions in the formation of the floral stimulus in Xanthium.
JAMES A. LOCKHART and KARL C. HAMNER 509–513
Some effects of ethanol extracts of potatoes on the activity of a phosphorylase preparation ..... HELEN K. PORTER and W. R. REES 514–520
The effect of abnormally prolonged alternating periods of light and darkness upon the composition of *Bryophyllum calycinum* leaves.
HUBERT BRADFORD VICKERY 520–526
Chlorine—A micronutrient element for higher plants.
T. C. BROYER, A. B. CARLTON, C. M. JOHNSON and P. R. STOUT 526–532
Growth inhibitor activity in Xanthium in relation to photoperiodism.
A. K. KHUDAIRI and ERIK K. BONDE 533–536
The flowering of sunflower explants in aseptic culture .... CARL E. HENRICKSON 536–538
Studies in plant metabolism. IV. Comparative effects of 2,4-dichlorophenoxyacetic acid and other plant growth regulators on phosphorus metabolism in bean plants (Continued) ..... S. C. FANG and JOSEPH S. BUTTS 539
News and notes 540–542
General Index, Volume 29 543–554

GENERAL INDEX

A

Absorption, translocation and metabolism of radioactive 2,4-D in corn and wheat plants, **56**

Absorption of inorganic ions by *Chlorella pyrenoidosa* Chick, **229**

Acer saccharum, nitrogenous constituents of sap exuded from the sapwood of, **360**

Accumulation of niacin in tomato leaf disks, light activated, **188**

Accumulation of niacin, light activated, precursor relationships in, in leaf disks from normal, light-starved, and zinc deficient tomato plants, **395**

ACKLEY, WM. B. Seasonal and diurnal changes in the water contents and water deficits of Bartlett pear leaves, **445**

Activity of chloroplasts in vitro, as related to their physical environment, **448**

ADDICOTT, FREDRICK, T. See SHOJI, KOBE, **377**

Aeration of entire plants under sterile conditions, a device for, **196**

Age of seed, as affecting seed vitality and other characters of cotton, **124**

Air, field, carbon dioxide content of, **500**

Air and leaf temperatures under freezing conditions, **102**

Air pollutants, fluctuations in sensitivity of Avena test due to, **182**

ALBAN, E. K. See CARAÑGAL, APOLINARIO R., JR., **355**

Alcohol, position of C^{14} in, formed from labeled glucose by corn root tips, **318**

Aleurone, thickness of, an inadequate explanation for higher niacin in sugary maize, **194**

Algae, turbidimetric determination of the dry weight of, **492**

Algal growth, measurement of, under steady-state conditions, **148**

ALLEN, PAUL J. See GRIMM, PHYLLIS WEISEL, **369**

ALLISON, RUFUS K. Studies on the photosynthetic reaction. II. Sodium formate and urea feeding experiments with *Nostoc muscorum*, **164**

ALVIM, PAULO DE T. An improved infiltration series for studying stomatal opening as illustrated with coffee, **97**

Amino acids, incorporation into protein of plant mitochondria, energy dependent, **202**

Annual Review of Plant Physiology, Volume IV, D. I. Arnon, Editor, **541**

Apple skin respiration, effect of scald on, **429**

Applicability of Poiseuille's Law to exudation of oleoresin from wounds of slash pine, **82**

Ascorbate system from cucumber, oxidation of reduced diphosphopyridine nucleotide by, **265**

Ascospore activation in *Neurospora crassa*, some physiological characteristics of, **418**

Assay of cytochrome oxidase activity of sunflower leaf tissue in relation to pH value and cation concentration of the buffer, **398**

Auxin content, free, changes in, during the photoinduction of short-day plants, **440**

Auxin inactivation and its relation to leaf drop caused by the fungus *Omphalia flavida*, **11**

Auxin on the flowering behavior of Wintex barley and Petkus rye, effect of, **292**

Auxin physiology in bean leaf stalks, **377**

Auxin relationships of the rice coleoptile, **92**

Availability of magnesium from organic carriers in artificial substrates, **337**

Avena test, fluctuations in sensitivity of, due to air pollutants, **182**

B

Bacterium, photosynthetic (*Rhodospirillum rubrum*), effect of light on the oxygen metabolism of, **177**

Bark, living, studies of the chemistry of, in relation to frost hardiness. VII. A possible direct effect of starch on the susceptibility of plants to freezing injury, **331**

Bark, living, studies of the chemistry of, in relation to frost hardiness. VIII. Possible enzymatic processes involved in starch-sucrose interconversions, **407**

Barley, etiolated leaves, development of chlorophyll and oxygen evolving power in, **143**

Barley, etiolated leaves, effect of temperature on the conversion of protochlorophyll to chlorophyll a in, **135**

Barley, Wintex, effect of auxin on the flowering behavior of, **292**

Barley roots, influence of hydrogen ion concentration on cation absorption by, **234**

Barley seedlings, translocation of radioactive isotopes from various regions of roots of, **342**

Bean leaf stalks, auxin physiology in, **377**

Bean plants, comparative effect of 2,4-dichlorophenoxyacetic acid and other plant growth regulators on phosphorus metabolism in, **365**, **539**

Bean plants, zinc content in relation to deficiency symptoms and yield, **76**

BEEKSKOW, HERBERT C. Obituary of Rufus Percival Hibbard, **109**

BEEVERS, HARRY. The direct oxidation pathway in plant respiration, **322**

BEEVERS, HARRY. The oxidation of reduced diphosphopyridine nucleotide by an ascorbate system from cucumber, **265**

BEEVERS, HARRY. Position of C^{14} in alcohol and carbon dioxide formed from labeled glucose by corn root tips, **318**

BENITEZ, ALLEN. See SMITH, JAMES H. C., **135**

BENNETT, EMMETT. The electrophoretic behavior of lignin, **297**

BIALE, JACOB B. Fruit respiration and ethylene production, **168**

Biochemical Preparations, Volume I, H. E. Carter, Editor; Volume II, E. G. Ball, Editor; Volume III, E. E. Snell, Editor, **401**

Biochemists, meeting of plant chemists and, **541**

Biosynthesis of carotenoids, **238**

Black locust, studies on the chemistry of the living bark of, in relation to frost hardiness. VII. A possible direct effect of starch on the susceptibility of plants to freezing injury, **331**

Black locust, studies on the chemistry of the living bark of, in relation to frost hardiness. VIII. Possible enzymatic processes involved in starch-sucrose interconversions, 407
Boawn, L. C. See Viets, F. G., Jr., 76
Boll, William G. Investigations into the function of pyridoxin as a growth factor for excised tomato roots, 325
Bonde, Erik K. See Khudairi, A. K., 532
Book review. Annual Review of Plant Physiology, Volume IV, D. I. Arnon, Editor, 541
Book review. Biochemical Preparations, Volume I, H. E. Carter, Editor; Volume II, E. G. Ball, Editor; Volume III, E. E. Snell, Editor, 401
Book review. The Cultivation of Animal and Plant Cells, by Philip R. White, 309
Botrytis cinerea, carbohydrate metabolism and oxalic acid synthesis by, 257
Brannaman, B. L. See Wedding, R. T., 64
